

Capsule offers the HoReCa channel the possibility of a new concept of outdoor space, which extends the use of its terraces and where its customers can enjoy an exclusive environment.

Made from aluminum and polycarbonate, the Capsule has a compact design that allows it to be transported in a standard truck, and has enough space inside to comfortably accommodate **4, 6 or 12 people**, depending on the model.

Flip-down window, which transforms into an outdoor side table

Side planters

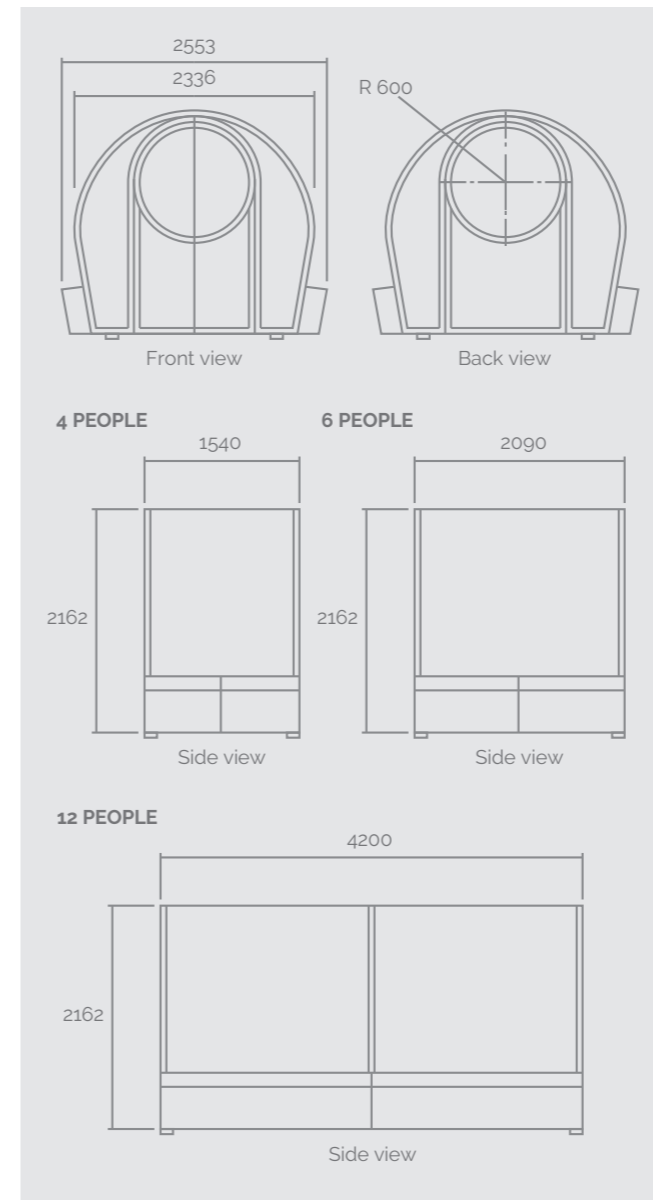

FEATURES

- Anchoring to the ground is not necessary thanks to the ballast provided by the side planters; adjustable feet for correct positioning.
- Double door with window, hinged with vertical axis with opening by smart lock.
- Large circular window with a diameter of 1.2 m, which flips-down into an outdoor side table (optional). It allows the waiter to serve the customer without having to open access doors.
- Energy self-sufficiency (optional).
- Wireless charger for mobile phone and Bluetooth audio equipment (optional).
- Raised floor (optional).
- LED lighting.

RESISTANCE

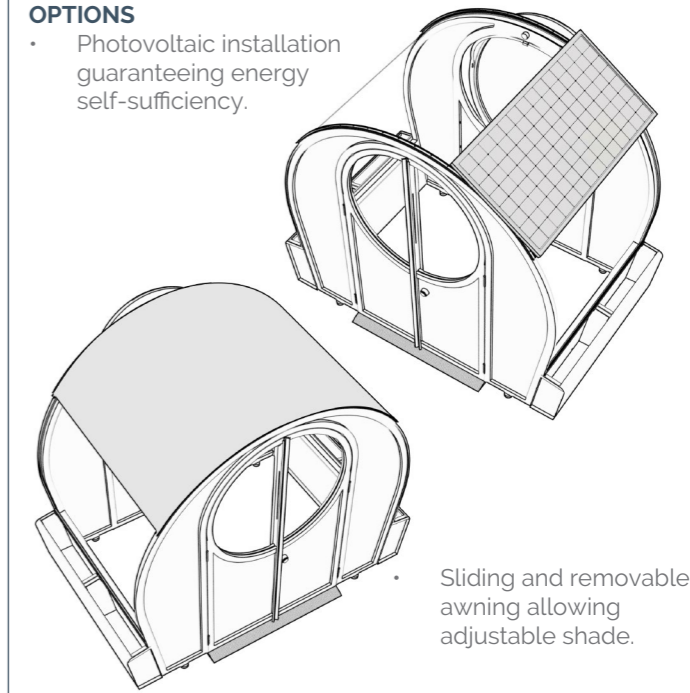

Designed for installation in demanding climates, it resists overloads of more than 500 Kg/m² without deformation.

DIMENSIONS

OPTIONS

- Photovoltaic installation guaranteeing energy self-sufficiency.

Sliding and removable awning allowing adjustable shade.

ACCESSORIES

- Table adapted to the design of the Capsule with two sizes available: **4 or 6 people**.

- Check out the recommended dimensions for chairs; also available as an option.

- Heating: a specifically designed collector uses the heat generated by a standard gas stove to cause a stream of hot air into the interior of the Capsule.
